

Glen-Gery Color Mortar Blend

Features

- High compressive strength
- High bonding strength
- Better rain penetration resistance
- Predictability
- No fillers or additives
- No field mixing
- Excellent workability

Identical brick sample panels incorporating different mortar colors.

Color Portland Cement-Lime Mortar

Glen-Gery Color Mortar Blend is a pre-colored blend of Portland Cement conforming to ASTM C150 and Type S hydrated lime conforming to ASTM C207, with metallic oxide pigments conforming to ASTM C979. Portland Cement-lime mortars may comply to either ASTM C270 or BIA M1-88 mortar types (M, S, N or O) either by proportion requirements or by physical requirements. This type of mortar, Portland Cement and lime, is recommended by the Brick Industry Association and other brick masonry experts. The colors are provided to enhance the architectural and aesthetic appearance of brickwork by matching, contrasting, or complimenting the brick units.
